

SIMATS ENGINEERING

Saveetha Institute of Medical and Technical Sciences
Chennai- 602105

Student Name: Venna Meenakshi Reddy

Course Code : CSA4305

Course Name: Internet Programming

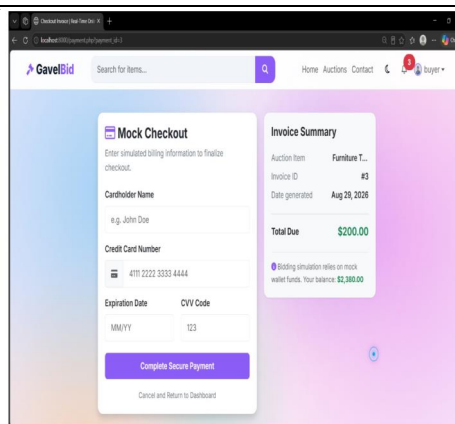

Course Faculty: Dr. Sudhagar D

Reg. No: 192471048

Slot: D

Project Title: Real-Time Web-based Auction and Bidding System

Module Photographs: (3 photographs –Module Photo, Individual student contribution module work in the project and presentation image)

MODULE 4

PAYMENT & TRANSACTION MODULE

- The system allows the winning bidder to proceed with the payment after the auction ends.
- Payment details are recorded and associated with the corresponding auction.
- Buyers can view their payment and transaction history.
- Sellers can view the transaction details related to their sold products.
- Administrators can monitor and manage payment and transaction records.

Project Description: (here you write what you did in this project (contribution) including Model Description)

- Designed and developed the Payment and Transaction Module of the auction system.
- Implemented secure payment processing for successful bidders.
- Developed functionality to record and manage transaction details.
- Implemented payment history and transaction tracking for users.
- Integrated the module with the auction and winner-selection process to complete transactions.
